ABSTRACT

The books in this annual listing have been reviewed and selected by the Children's Book Committee, a voluntary group of parents, teachers, librarians, writers, and specialists in various related fields. The listing contains books written for the nursery years through age thirteen. Titles are arranged, for the most part, according to age groups and are further differentiated into topical divisions which are reflective of the interests and abilities of children. Nonfiction books of information are listed in topical groupings under a special interest heading. Other sections include collections, poetry, holidays, books for parents and children, reprints and new editions, and paperback reprints. Each listing contains bibliographic information, a brief annotation of the book, and the suggested age level. Starred titles indicate books considered by the Committee to be of outstanding merit. Introduction

Each year bookshops and publishers' lists are bulging with a tempting array of new books for children: tall books, tiny books, fat books and thin books; picture-books for the youngest; fun books and serious books of information about everything you want to know; books on how to make and do practically anything.

How to choose for a particular child or children? How to find among the many a book which will please, inspire, inform, or perhaps open doors to understanding, whether of today's realities or of man's past achievements; of science or the inner world of thought and emotion; the magic of fantasy; the beauty of poetry and creative art? They are all there for the choosing.

To help parents, teachers, librarians or others who care about children and their reading find their way through the plethora of new books, the Children's Book Committee have reviewed some 2,500 juveniles published in 1974, and selected the following titles for this annual listing. (A few 1973 titles received too late for last year's listing are included). The Committee is a voluntary group of parents, teachers, librarians, writers and specialists in various related fields. They meet weekly throughout the year to discuss and evaluate each book, its literary merit, its age suitability, and its possible impact on the young reader or listener.

The listing ranges from the nursery years through age thirteen—since young people begin then to dip widely into adult and young adult literature. Its criteria of selection takes into account the varied interests of boys and girls at all ages and their differences in reading skills. For convenience, titles are arranged in age groups and topical divisions, with some specified as easy to read. In the division for older boys and girls two groupings, *Stories about Today* and *Growing Up*, single out books reflecting the social and emotional stresses of today's world. Non-fiction books of information are listed in topical groupings under the general heading: *For Special Interests*. Because of the variations in children's reading tastes and skills, it is advisable to browse through several age and special interest listings with a particular child in mind.

Starred (*) titles indicate books of outstanding merit. Inexpensive books of high quality are included wherever possible, as well as good new editions which bring old favorites to the attention of new readers.

Especially welcome is the increase in fine paperback reprints of recent and not-so-recent favorites that have proved their appeal to readers, ranging from the youngest to the teen age.
